## 36<sup>th</sup> Year Anniversary Promotion

\*\*\* Powered by our Data Research Development Technology Engine.

**As we are celebrating our 36th Year Anniversary this October 2011**, Crystal Swiftlets is proud to present you the latest high-tech Aerodramus Acoustic Tweeter - Model CS98AB

This two-part tweeter set is specifically design for use in internal nesting areas with the objective of attracting more edible white nests swiftlets and retaining them eventually.

This NEW HIGH TECH CS98AB tweeter is specially designed for optimal sound output. The Model's special physical architecture was born out of many years of research and development to determine the nest pattern surface grip for swiftlets and to encourage them to build their edible white nests comfortably.

This NEW HIGH TECH CS98AB tweeter is easy to fix and install.

After so many years of Research and Development, this special tweeter CS98AB set has the most optimal acoustic configuration specifications for nesting purposes than any other types of swiftlet farm tweeters in the world.

This CS98AB tweeter set is also specially design to encourage greater number of nests per tweeter per area of installation.

Also, this NEW HIGH TECH CS98AB tweeter set is specifically designed with solid and dimpled exterior to allow for east harvesting of nests.

The CS98AB set also has a concave dimension which allows for larger and thicker nests to be formed.

With this CS98AB HIGH TECH tweeter set, past problems of working around right-angled nesting planks will easily be solved with the right -angled inner back of the CS98AB tweeter set which automatically fits nicely and easily to the corners of all nesting planks.

With this CS98AB HIGH TECH tweeter, fungus and mold problems which easily encountered within most swiftlet farms shall be a thing of the past as fungus and mold are totally adverse to the polycarbonate material of the tweeter set.

This HIGH TECH CS98AB tweeter is made from high quality honey-combed interior structure which allows for greater wear and tear, is long lasting and requires little or no maintenance to function properly.

## Technical Information

Frequency response: 2.3k- 23kHz

Sensitivity: 83+-2d (2.7 v/m)

Power RMS/Max: 75/200 watts

Optimal sound design architecture to enhance nesting frequency of swiftlets

Easy to Fit and Install

Optimal Acoustic Configuration

Encourage Greater Number of Nests per tweeter

Honey-combed interior Structure Allows for Greater wear and tear

Long Lasting

Solid and Dimpled Exterior allows for easy Harvesting of Nests

Concave Dimension allows for Larger and Thicker Nests to be formed

Right-angled inner back helps solve pest problems and space wastage amongst corner planks.

No more fungus and Mold problems

No maintenance required

Minimum Order Quantity: 50 sets

Accessories:-

Screws for installation are provided

CALL US TODAY for a very special promotional price in conjunction with our 36<sup>th</sup> Year Anniversary Celebrations.
